Puzzle time

12 to 15 - answers

Four questions in one for this puzzle.
There are lots of ways of doing this
but here is one answer for each
square.

1	8	3
5	12	7
6	4	2

8	4	1
3	13	7
2	6	5

7	3	4
6	14	2
1	5	8

6	1	8
2	15	4
7	5	3

Remember, these show
only 1 possible answer
for each of the square
puzzles.

This week's challenge is below.

Puzzle time

Food for thought

Multi was lazing on the beach when he was feeling peckish. He went to the café and bought 2 iced buns and 1 lolly. It cost him 80 pence.

Divvy came along just as Multi was finishing the iced bun.

"Hey, where's mine?" he shouted.

"All gone" muttered Multi, feeling rather guilty.

"Well, I'll just get my own then," said Divvy, "I'll show you!"

Showing off, Divvy bought 3 iced buns and 2 lollies. It cost him £1.30.

He took them back and sat down next to Multi and then ate all the buns in one go.

Five minutes later:

"Err, I don't feel very well," groaned Divvy, "would you like to buy the lollies off me?"

"OK," said Multi, "How much did they cost?"

Good question: how much did each lolly cost?
