Ideas for Home Learning

Choose from the following activities:

- 1) If you could be an insect for a day, which would you be? Why? Where would you live? How safe would you be from predators?
- 2) Draw a bug's eye view of your bedroom, or any other room in your house. How would things look from high up on a wall or ceiling?
- 3) Compare two "minibeasts". How are they similar? How are they different?
- 4) Use art materials to create a butterfly with a symmetrical wing design.
- 5) Write a diary entry, written from the point of view of an insect. Include both events that happened and your feelings about them.
