

Predator Topic – Home Learning Projects.

These ideas come from the Home-Learning suggestions that usually come home over half term, in preparation for the next topic! Not all of them may be achievable, but please do take on anything that appeals to you!

There is no shortage of creativity in Class 3 (including you, parents!). What else can you come up with to explore this topic?

What will you choose to do?

- Find out about predators using non-fiction books at home or online. Look for information using contents, glossaries and index pages. Write down any new facts you have learnt and bring them in to share with the class.
- Learn how to spell the names of some of the weird and wonderful predators of the world – the weirder the better!
- Research and record a predator from each of the subgroups: mammals, birds, insects, arachnids, reptiles, fish and plants.
- Make a mini fact file or short digital presentation about your favourite predators and bring it to school to share with the class.
- Make a non-fiction book about a predatory animal – maybe your pet cat?
- Make a predator glossary to explain all the specialist vocabulary from this topic.
- If you could be a predator for the day, what kind of predator would you be, and why? Where would you live? What features would help you hunt, catch and kill your prey? Record your ideas on paper and bring them in to share with the class.
- Use the web to research what different predators eat. Create food chains for a variety of different predators using materials and tools of your choice.
- Devise a 'What am I?' quiz about predators and try it out on your friends and family. How many questions does it take for them to get to the right answer?
- Write a short, imaginative story or poem from the point of view of either a predator or its prey.
- Write a set of instructions (a program) for how to care for your ultimate predator!
