

## **Week 8: Topic: Cooking – did you know?**

Did you know that cooking is a great way to practise your Maths (measuring), English (reading recipes) as well as Science (yes, Science)?

Thank you to everyone who has posted pictures on our school website, or to Mrs Marshall using Showbie. It is evident that one thing a lot of you in Class 5 love to do is COOKING!

### **Please choose one of the following activities:**

#### **ACTIVITY ONE:**

- 1) Have fun cooking with an adult. Take a photograph if you can. Then think about the following:
  - a. What did you like?
  - b. What didn't you like?
  - c. What did you find easy to do?
  - d. What did you find difficult to do?
  - e. How could you improve it?
  
- 2) Now find one of your favourite recipes. You can do this by looking through cookery books or visit <https://www.bbcgoodfood.com/recipes>  
(You know what Mrs Marshall's is ... chocolate cake!)

Then, if you can, log on to Showbie, post a photograph of what you cooked, your thoughts about your cooking and what your favourite recipe is.

#### **ACTIVITY TWO:**

Discover the science behind mixing, dissolving and separation, by visiting:
